Treasure Valley Businesses

Re: Combolisk project

Dear Business Leader:

We are about to embark on a new era in marketing for the Treasure Valley as the precursor to a movement across the country. Our new system will not only link businesses to customers utilizing state of the art technologies, it will also yield opportunity to return to constitutional roots in our community. I am a former billboard operator in the Treasure Valley and I am calling on our business leaders to recognize a major injustice in our lands. Like the Minutemen of yesteryear, I am asking you to carry on the tradition of our founders. One if by land; two if by sea. Three if by Combolisk.

We have located a [site](#) in Meridian, Idaho for the first [Combolisk](#). This is a new term I have coined for combining the words community and obelisk, the first recorded use of a communication site to notify the traveling public. Due to a precedent set last year by the Supreme Court in [Reed v. Gilbert](#), we believe there is an opportunity to combine the needs of the community with digital marketing to create a virtual assembly of digital broadcasting sites in support of our communities.

According to the precedent, leaders must validate their laws restricting speech in order to make them constitutional. In my recent [request](#), under the freedom of information act to our [states](#), I found that Idaho as well as the other states, was coerced into signing contracts to limit advertising to prevent loss of highway funds. The value of beautification was never taken to the people and validated. This invalidates the law that none of our governors seem ready to address, which was so important to our founding fathers that they preserved it as the First Amendment.

Our concept is to create a member based nonprofit organization that will utilize reasonable rules, and a quota system for managing and developing the digital outdoor broadcast space. We intend to build a non-permitted digital broadcast site and defend its use. Nonprofit signs, such as political ads and public notice do not require a permit. Therefore we will test the new precedent against our use of the Combolisk, alternating between nonprofit with paid sponsorship of digital images like the one we will contract with you. We intend to record the development of Combolisk sites to the new standard. This will include the upgrade of legacy billboards. The

public record will include land owner info and development including witness and certified drawing leaving no value we can see that could be claimed to prevent our unhindered use of the Combolisk sites.

Once we build a model here, we will allow independent operators to build a linked virtual network across the US by adhering to our standard. The standard will include reasonable rules to preserve the space and a quota for limiting growth, which will preserve the value for offering the free noncommercial space.

By changing from the value of beautification to that of community, everyone wins. Local and national businesses get broadcast space. Noncommercial and the public including focus on free broadcasts to candidates for office will benefit from free broadcasts. The public gets a managed use of the broadcast space, but everyone has to play to win. If the public doesn't participate and push for the nonprofit management and use of the space, then it will continue to be developed as billboards with no requirement for free use by the public. Our government will continue to ignore unconstitutional law.

Once the first Combolisk is operational, we will use funds for developing tools on our web site, [Combolisk.org](http://Combolisk.org). Our hope is to use a social movement to bring awareness to our issues of free speech and our current political system so that we can restore the value of community first. We will create a link between the Combolisk broadcast sites and the web, providing games with rewards from one percent of the revenue that will be given back to the public. The [Patriot Game](#) will help display those that help support our movement. Look for your business to be displayed.

We will also use funds to support a spin off organization, [Equal foot](#). We believe special interests in our nation have put their own interests above those of the country. [Money has corrupted our system](#). Giving free political broadcasts to any candidate agreeing to campaign expense caps and that these caps will be reduced, each campaign until there is unanimous support of the candidates to raise the cap or authority by a majority of the people, reducing the effect of money in our political system. Regardless of the outcome of the 2016 election, a candidate that can develop a base in social media can potentially develop a platform prior to taking money from special interests to market the candidate's name if we can provide a national network of awareness for free. The Combolisk organization can do that. If we don't our consolation is management and preservation of the outdoor space for the noncommercial sector.

We are asking for the businesses of the Treasure Valley to support our movement. I know the history and believe this is a market of patriots. Our location in Ada county, on the Boise/Meridian line is the center of traffic in the Treasure Valley as well as the corridor to the pacific northwest. The state would not approve the location because it is zoned rural, although it could receive a billboard permit from the county. The state will have to prove that we do not have authority to coin a new phrase and avoid definition as a billboard even though they allow highway logos, bus benches, and transit shelters, which violate billboard law. They will also have to prove that the digital display infringes on the value of beauty even though the structure can exist legally without permit. Finally they will have to prove the combination of digital lights proves their value of beauty when formed into the logos and messages you provide, which are like the art submitted for digital billboards. If they choose to challenge our alternating use of nonprofit and sponsored broadcasts, we have the precedent on our side and believe we will prevail or the state will be forced to take down the site and pay just compensation upon removal, as this is clearly a precedent for billboards.

It is theoretically possible that there will be a suit over the right to remain. I anticipate two hundred local businesses will unite to defend our cause. This way we distribute the risk. If a local billboard operator was to offer the space, a competitive price would be five advertisers per side at five thousand dollars per month. We are asking two hundred businesses for five hundred dollars per month and to be rotated between each side of the two sided broadcast site. The traffic count is over one hundred fifteen thousand cars per day and your broadcast

will come up within every seven minutes of the day. Your business will have an excellent opportunity to reach the entire valley at the heart of the Treasure Valley where there are no competitive billboards for miles.

We are overselling the number of broadcasts, but we have dramatically reduced the cost to participate. In doing so, everyone we contact should be able to participate. We will offer a fifteen percent commission to bona fide third party advertising agencies if you place the business through them. We are developing this movement with just a few family members in between our other jobs. We are focusing on the future management of the space and not as billboard operators. We are committed to the nation and will help start to heal our communities. We ask that you support us in developing this nonprofit into a national movement. We ask for your commitment to the space. We also ask that you provide us with camera ready artwork. If you do not already have creative, we suggest you use a local graphic artist and/or photographer. Freelance.com or additional web sites can also offer competitive services.

We are asking for a three year commitment, billed quarterly in advance. We are asking for a three year contract to fund our suit as necessary. The first payment is due by February 1, 2017 with a planned broadcast site operational April 1, 2017. We will deposit the money in an escrow account and not begin until we have at least one hundred businesses contracted. We will return one hundred percent of the funds if we do not achieve our goal. We ask that payments continue in the event the location is lost, as we believe we will prevail by the courts. If the location is lost within the first six months, we will cancel the contracts. We will provide comparable broadcast space or a percentage share of a settlement in the event we receive just compensation for the loss of the space. Your maximum exposure is limited to three thousand dollars should we develop the broadcast site and lose everything.

Once we reach our goal and avoid a suit, we will initiate an option to buy the nine acres the broadcast site will be built on. We will fund twenty percent of our revenue following resolution of the defense of the site to the development of a park for the community. We only need a few feet of space and would like to commemorate the first Combolisk, as well as those businesses that defend our right to free speech. Please make your business a patriot in history, or our fight to restore free speech and organize the outdoor space as it will continue to evolve with or without us.

If we do not act together in this new era of “minute businesses”, we will forever lose this idea to preserve the space for our communities. Someone will test the fact that no state has prepared for the challenge of highway beautification as a result of last year’s decision. The continued development of the space is inevitable. Until the people are ready to remove the inherent right of the space to the tune of an estimated seven trillion dollars, the use will continue; consequentially nonparticipation is not an option.

Included is a contract for your approval. If you are a patriot and your “minute business” supports our constitution, please fax or email a signed copy to us. We will then forward an invoice for the initial payment to us in advance, which will not be due until February 1, 2017.

Sincerely,

Michael L. Macgowan Jr.

## Contract for Digital Broadcast Space

	BROADCASTER
Name	
Address1	
Address2	
City, ST zip	
Phone	
Email	
Fax	
BROADCASTER /Product	
Campaign	
PO/Reference	
Start Broadcast Date	April 1, 2017
Rate (quarterly)	\$1500.00
Duration (quarters)	12 (3 years)
Location	I-84 East of Rolling Hills Dr. 43.59,-116.34

Approved by BROADCASTER:
Date:

### Standard Conditions

- Time is of the essence. The Broadcaster must provide art work, material(s), and instructions fourteen (14) days prior to the initial broadcast date. In the event of default by Broadcaster, billing will occur on the initial broadcast date.
- Rates are net. Initial Payment is expected by February 1, 2017 and upon quarterly intervals in advance until contract completion. If the broadcast site is removed by a governing authority within six months of the initial broadcast date, this contract shall terminate after Broadcaster has paid two quarters. If the Supreme Court issues a final order invalidating the use of the broadcast site for Broadcaster, this contract shall terminate. In addition to the contracted rate, Broadcaster agrees to pay Broadcasting Company all costs including attorney fees and collection costs plus a monthly service charge at the rate of 1.5% of the outstanding balance on the invoice to the extent permitted by applicable law. Delinquency will be considered a breach of this contract. Payments will be made to the oldest invoices outstanding.
- This contract is non-cancellable without the written consent of Broadcasting Company.
- Broadcaster grants Broadcasting Company the right to use copyright and trademark materials in the broadcast and do not infringe on any third parties' intellectual property rights or community standards. Broadcasting Company retains the right to reject any broadcast. Broadcaster will indemnify Broadcasting Company for the use of all productions materials for broadcast and defend Broadcasting Company against use of the production materials.
- This contract represents the whole agreement for broadcast. Broadcasting Company will not be bound by any stipulations or representations that are not described in this contract. Any breach of contract shall not constitute a breach of the entire contract and the balance of the terms shall remain in effect.
- If Broadcasting Company is prevented from broadcasting for any reason beyond its control, or if Broadcasting Company is unable to provide the contracted broadcast space, this contract shall not terminate. Credit shall accrue until space is available or a suitable replacement is made. In the case of illumination, should there be a loss of more than 50% illumination; a 20% pro-rata credit based on four week billing will be given.
- Broadcasting Company is not responsible for storage of broadcast materials following sixty days of contract expiration unless provision is made for storage.
- An installation time of seven days may be required for broadcast.
- Broadcaster is responsible for artwork to broadcast and all associated production costs. Said production must meet Broadcasting Company specifications in order to be broadcast. Replacement of damaged, faded or unusable production materials is at the expense of Broadcaster.
- Cutouts and/or extensions where allowed and possible are limited to 5 feet above, 2 feet to the sides and 1 foot below the broadcast space. A one-time fee of \$100/ft will be billed for any extension.
- Digital displays may have up to two hundred broadcasters rotating broadcasts at four second intervals. A community service broadcast will appear initially and as each eleventh broadcast
